## Adding value to careers

All information contained in this report has been prepared and is a copyright of PexiScore.com based on information and responses provided by the candidate. Consequently PexiScore does not accept any responsibility on the accuracy and authenticity of the information provided by the candidate. The PexiScore CareerGraph is valid upto six months or until the candidate initiates any changes in the information provided till initiation of this report. The report does not reflect the individual views of PexiScore. This report is governed by the terms and conditions of PexiScore.com

# INTRODUCTION

---

This Report helps to summarise the career aspirations along with the learnings and choices that might appear before you for the forthcoming future based on your QUALIFICATIONS, COMPETENCIES AND APTITUDE. The is to be a guide while allowing you to understand your strengths and weaknesses to better cultivate yourself. We advice that the report be read carefully with a few 'own action plans' that you might want to draw up at the end of the report and follow it up judiciously for your own success.

The report does not cater to unconventional career aspirations; however it will provide valuable tips for all. You might want to do something that is either completely new to reality or wish to follow a path that is both adventurous and unconventional. However, we have covered most of the conventional, traditional and upcoming career choices that one has at his/her disposal today within this country and also outside its borders. The main aim is to highlight your areas of strength and weaknesses to further develop and strengthen them for best career results.

While we aspire to provide you a complete, error-free report, being a technical product, please feel free to write to us at [support@pexiscore.com](mailto:support@pexiscore.com) in case you spot any errors or malfunctions or anything you find is not in sync. We shall rectify it without any further cost to you. Please feel free to reach out to us for anything else too! We are here to help.

## BENEFITS OF CAREERGRAPH

---

By subscribing to this report, you get an automated registration at PexiScore.com where you shall have access to a host of features and job search.

You shall also have a free resume created for downloading. Keep updating your records at PexiScore.com to help us guide you on new job openings, career tools, learning and guidance on careers and jobs.

As you read through the content of the pages below, you shall find individualized description and interpretation of your basic interests, your choices and 'know yourself better' using psychometric assessments that you have undergone. The actual scores against the attributes are not displayed to eliminate the concern for the relative "goodness" or "poorness" of a given score. The graphs showcase 'relative' strengths and weaknesses found in you using our assessment techniques.

Secondly, while each graph and comprehension stands totally by itself in terms of its content and displayed message, the complete information becomes easy to understand and comprehend AT THE END, making it a constructive, actionable feedback for the candidate.

Some of the potential paragraphs and content outline 'Behavioral strengths and weaknesses' associated with your approach to situations. This is neither wrong nor right; it depends on the situation and showcases how you would deal with a particular problem, decision or effect most of the time.

They thus indicate your natural, effective behavior. However, these statements are non-judgmental but help you understand that being maximally productive is dependent on having certain basic approaches modified or improved to be a better professional in the first place. It also works like an "early indicator system" in identifying patterns in your behavior which might have not been noticed and you may want to improve further upon to climb the ladders of success in your respective fields and careers.

This PexiScore CareerGraph attempts to provide you feedback and be a guiding tool in your career aspirations. They also provide a foundation to develop and install higher teamwork and interpersonal capabilities for success at the workplace. This report does not intend to change but only validate what is already within you and how you can capitalize on your strengths to develop better career paths. We wish you success in your career aspirations!

## HOW TO READ THE REPORT

---

Many students are stuck between a career choice and a choice of their preference. This is more pronounced as we scale up the age ladder and as technological interventions bring forth newer career choices for all of us. This CareerGraph Report from Pexitics tries to understand you not only as a student of a subject matter, but also as a person and as one who exhibits strong interest and temperament for some particular career traits. So we consider this as a reflection of your persona and not just a report. At times you may not want to be embarrassed or the pressures of pursuing a particular choice of career may not be enjoyable. It is based on these issues that we suggest that the reading should also be personal and limited to only people who matter or are experts in this field; hence it is disclosed to you so that you can discuss it or ponder on it with your discretion and take action to further your career and personal ambitions in life.

Some of the career choices listed may surprise you completely, and these are choices that you opted for based on your sub-conscious mental framework at the time of taking the assessment. Hence we have also reflected upon using multiple options of education, interest, temperament & aptitude to tell you some of the best career choices that might suit you. Finally, we expect you to further reflect upon the report and read it multiple times to learn something new about yourself.

The report does not endorse that the career choices you have pre-determined are not a good fit for you. The report showcases a greater chance of success if the choices are aligned in your mind and heart.

If you were to ask friends and family about the career choices we suggest, you might find a lot of them agreeing that these careers choices perfectly reflect how they view and perceive you.

The final message we seek to send is that rather than dismissing the occupations we suggested in the pages below, you may want to look deeper and reflect. If they are already in line with your thoughts, you are truly lucky and if not, just remember that you have nothing to lose but to make a few changes to your goals and ambitions; you shall reach there sooner and also be a lot more happier later that you took those choices.

All scores depicted using graphs are color-coded for ease of reading and understanding.

**Red** – The candidate has scored Low (between 0-20% )

**Orange** - The candidate has scored Average ( 20-40% )

**Yellow** -The candidate has scored Above Average ( 40-60% )

**Light Green** - The candidate has scored Good (60-80%)

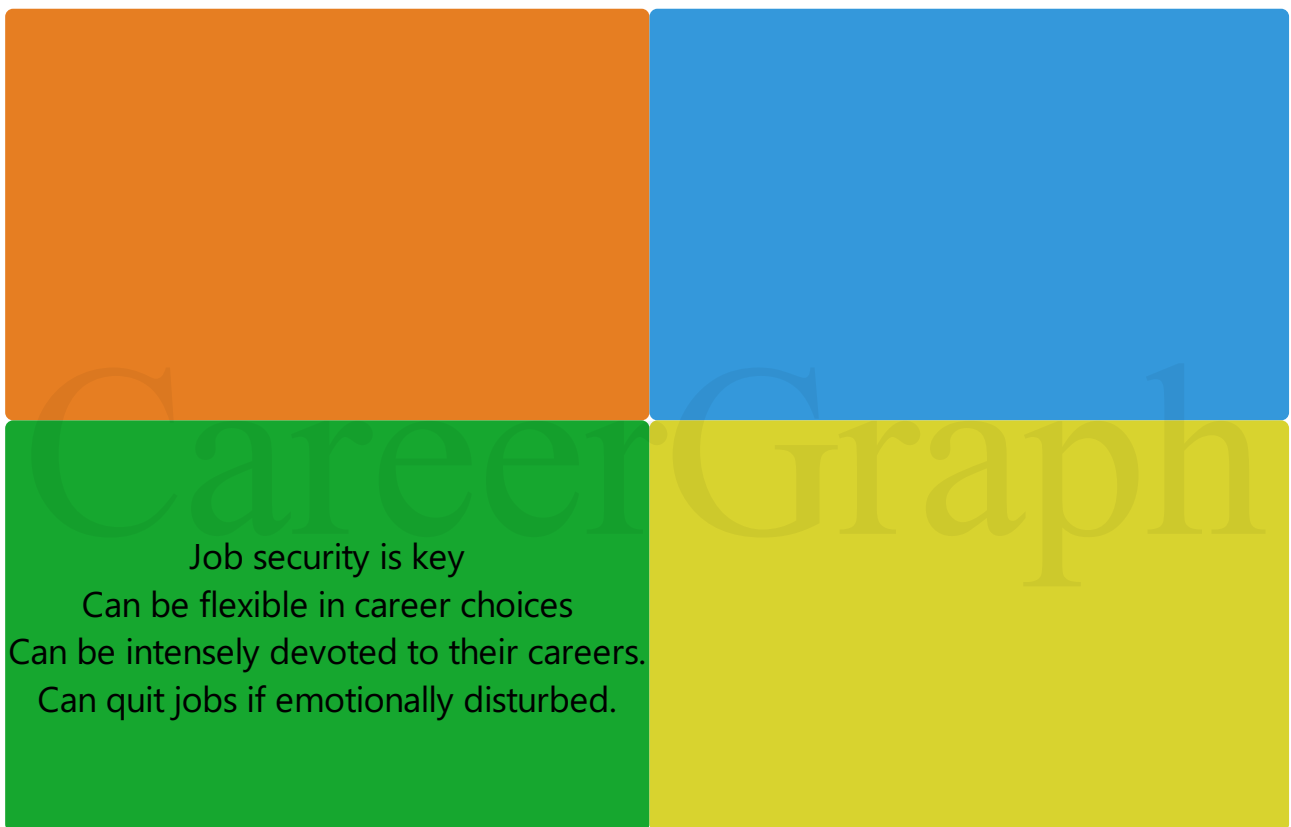

**Dark Green** – The candidate has scored Excellent ( 80-100% )

*"Two roads diverged in a wood, and I—  
I took the one less traveled by,  
And that has made all the difference."  
~ Robert Frost*

## TEMPERAMENT PROFILING

Temperament Profiling includes your natural instincts towards work environment, behavior approach towards people and work situations and particular tastes in industries. Please view this as an important part of your comfort based work environment profiling to help you choose careers that bear a mental match to your temperament. This also furthers your choice of day-to-day operations that you would find more comforting. The four colours denote four particular temperaments; we showcase the one you match. Read orange as warm; blue as cool; yellow as earthy and green as practical.

You are a charismatic, positive-thinking, fearless, inspiring, and independent in your temperament. You possess an inborn ability to lead teams and this makes you a good candidate for job roles which make you important to the organisation and provide authority. You are good-humored and likeable to your colleagues for your positive attitude and hard work.

"We must become the change we want to see."  
-Mahatma Gandhi (He is known as the Father of the Nation - India)

## BEHAVIOR PROFILING

The Work Behavior Assessment is a proprietary questionnaire used to assess applicant behavior traits with the help of positive & negative questions through the Likert Scale timed assessment methodology. The questions are segmented into outcomes against attributes and are showcased in terms of Strengths and areas of improvement. The Work Behavior scale measures attributes more necessary in a job environment and focuses on traits key to working environments today.

## Your Strengths

---

You are a very good team player and would be an asset to groups and teams. Good work !! You seem keen in upskilling with new and latest knowledge, tools and resources. Keep upgrading yourself like this and you will surely succeed. You are good in handling and managing teams but maybe not be proficient in managing their expectations. Do you agree? You can improve on this. You take proactive steps but may sometimes lack capability in solving problems. Do try more problem-solving exercises. You are generally confident in taking decisions or choosing amongst alternatives.

## Areas of Improvement

Self motivation is key for you to imbibe a proactive approach. You need to keep motivating yourself. Be more calm when faced with stress. Build more confidence and belief in your self. When faced with conflict, handling it using negotiating skills is key. And we advice you to develop it more.

## INSIGHTS ABOUT YOURSELF:

You are often described as helpful, understanding, responsible, warm, cooperative, convincing, friendly, kind, generous, and patient.

You are often described as genuine, sensible, practical, natural, thrifty, modest, persistent, and honest.

CareerGraph

---

*"Honest disagreement is often a good sign of progress."*  
-Mahatma Gandhi (He is known as the Father of the Nation - India)

---

The behavior assessment helps us showcase your core and secondary motivations at work. This can help you review your strength and organise your career aspirations towards job roles that are in sync with your behavior outcomes.

## WHAT MOTIVATES YOU

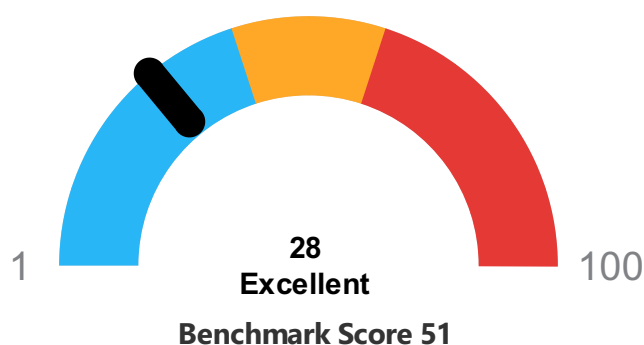

This section observes your **Core** and **Secondary** motivations at work. You are expected to have more than one motivating factor/s, and thus **Core** denotes the higher propensity followed by the **Secondary** factors.

<b>Core</b>	<b>Social Acceptance</b> You like work activities that assist others and promotes learning and personal development. You prefer to communicate more than to work with objects, machines, or data. Your preference is to teach, to give advice, to help, or otherwise be of service to people. You are suitable for roles in support functions.
<b>Secondary</b>	<b>Enterprising</b> Our assessment shows that you would excel in work activities that follow set procedures and routines. You prefer working with data and detail rather than with ideas; also prefer work in which there are precise standards rather than work in which you have to judge things by yourself. You like engaging where the lines of authority are clear.
<b>Secondary</b>	<b>Creative/Independence</b> The candidate's interests lie in work activities that deal with the artistic side of things, such as forms, designs, and patterns. Likes self-expression in their work. Would prefer work settings where work can be done without following a clear set of rules.

## Speed & Accuracy Quotient

### Accuracy

### Speed

The meters above denote your score in Speed and Accuracy across all segments. For Accuracy, a higher score is better while a lower score is preferred for Speed.

The Benchmark Scores showcase the peer group average.

## APTITUDE PROFILING

Aptitude profiling uses four key areas of applicant responses to provide insights into the English language, comprehension, numeracy, logical reasoning and situational judgment to showcase strengths and areas of improvement. These help assign weightages in providing more unique recommendations for career and industry choices. The report will also provide insights on which areas of work where the applicant can be highly successful if career aspirations are in line with the abilities and strengths enumerated in the report.

Your Score Benchmark

## Your Competencies

You are relatively proficient in comprehending fundamental arithmetics and applying numerical concepts. You can improve on Numerical ability further, through practise. You gather information systematically and can establish facts & principles for efficient judgment. Very likable qualities of a good leader. Good going !! You are quite proficient in English comprehension and dialect. You gather information systematically and can establish facts & principles for efficient judgment. Very likable qualities of a good leader. Good going !! You have good logical thinking while executiing and determining the optimum decisions. That is good news and will bring you success.

## Areas of Improvement

We are pleased that there is nothing much for you to comment in this aspect. Kudos!

## INDUSTRY INTEREST PROFILING

The Industry Interest Profiling reflects your interests in select industries where you would be most productive and summarises them in a scoring pattern. This does not include skills and abilities. The report points to potential industries that suit your interest and likeliness to continue in a longer horizon of time. The aim is to provide insights on select industries that could be a rewarding career option for you and one that addresses your value systems and mental approach of comfortability.

Please find below the top five industry clusters that suit your interest.

### 1. Engineering

Applying principles and technology of chemistry, physics, and other scientific disciplines into the planning, designing, and overseeing of physical systems and processes. Duties may include creating, testing, developing, and maintaining tools, machines, electrical equipment, buildings/structures, or other physical entities

■ Engineering and capital goods ■ Automobiles ■ Auto components ■ Manufacturing ■ Aviation

### 2. Government & Admin

Serving and protecting the best interests of the community, environment, and/or individuals, adhering to central, state, and local laws. Duties may include investigating, regulating and disseminating information, fire fighting, ticketing, inspecting documents and/or files, responding to emergency situations, patrolling designated areas, guarding establishments, and providing other social measures.

■ Railways ■ Roads ■ Banking ■ Oil and gas ■ Ports

### 3. Manufacturing

Performing hands-on work functions related to the installation, maintenance, and repair of various machinery, systems, vehicles, and other serviceable equipment. Duties may include diagnosing, adjusting, servicing, and overhauling engines, telecommunications and/or security systems, heating, vacuuming, and air-conditioning units, and electronics. Producing, creating, and/or manufacturing a variety of products (e.g., food, lumber, electrical equipment, fabrics, metals, plastics, stones, fuel) through the operating of specialized tools and/or equipment.

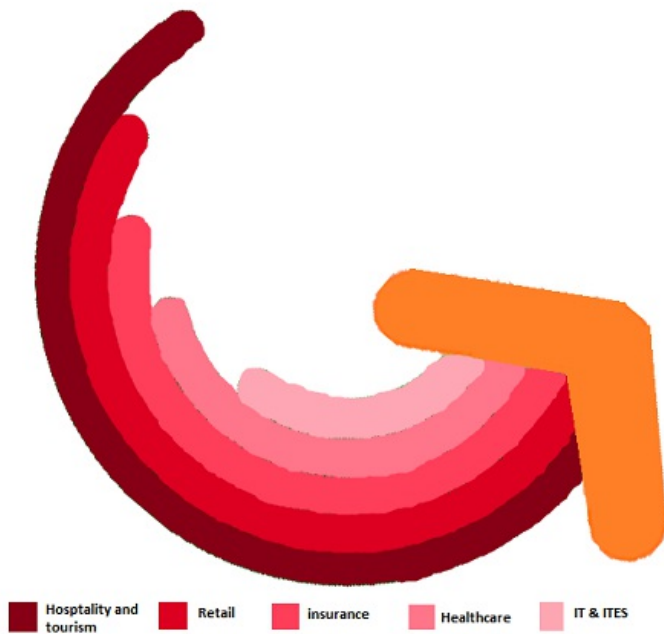

# CareerGraph

### 4. Technology

Designing, developing, and maintaining databases, software, hardware, networks, and other information/logic systems. Duties may include collecting/organizing data, computer programming, providing technical support, web design, and configuring communication systems, among other data-driven functions. Duties may include researching, collecting/analyzing qualitative and quantitative data, conducting experimental studies, devising methods to apply laws and theories to industry and other fields.

## 5. Hospitality & Tourism

Operating and/or managing navigation and transportation related businesses or healthcare. Duties include nursing, caring, ticketing, maintenance, directing air traffic, managing guests relations and/or properties. Counseling, rehabilitating, and/or supporting social and psychological matters of individuals, groups, or communities. Duties may include helping individuals maximize their mental and emotional well-being, cope with addictions, and lead healthy lifestyles, as well as providing spiritual, moral, or vocational guidance.

# CareerGraph

*"He who conquers himself is the mightiest warrior."*

-Confucius (He was a Chinese teacher, editor, politician, and philosopher of the Spring and Autumn period of Chinese history.)

We look at your Interest Inventory Assessment results and are noting down some of the Industries that are of intrinsic interest to you.

## ENGINEERING AND CAPITAL GOODS

---

Indian engineering sector is divided into two major segments - heavy engineering and light engineering. The capital goods and engineering turnover in India is expected to have reached US\$ 125.4 billion by FY 2016-17. Likewise, Electrical equipment market size is expected to reach US\$ 100 billion by FY 2021-22. Comparative advantage vis-à-vis peers in terms of manufacturing costs, market knowledge, technology and creativity has been a driving force for engineering exports from India. The construction equipment market in India is expected to reach 131,000 units by 2022.

The approval of significant number of special economic zones (SEZs) across the country and the development of the Delhi Mumbai Industrial Corridor (DMIC) across seven states is expected to further bolster the engineering sector. With 100 per cent Foreign Direct Investment (FDI) allowed through the automatic route, and initiatives like 'Make in India', major international players have entered the Indian engineering sector due to significant growth opportunities available.

## AUTOMOBILES

---

The automotive manufacturing industry comprises the production of commercial vehicles, passenger cars, and three & two-wheelers. Two-wheelers are by far the most popular form of vehicle in India, taking an 80% share in 2015-16.

The government aims to develop India as a global manufacturing as well as a research and development (R&D) hub. It has set up National Automotive Testing and R&D Infrastructure Project (NATRiP) centres as well as a National Automotive Board to act as facilitator between the government and the industry. The Indian government has also set up an ambitious target of having only electric vehicles being sold in the country by 2030. Alternative fuel has the potential to provide for the country's energy demand in the auto sector as the CNG distribution network in India is expected to rise to 250 cities in 2018 from 125 cities in 2014. Also, the luxury car market could register high growth and is expected to reach 150,000 units by 2020.

## AUTO COMPONENTS

---

The Indian auto-components market contributes almost seven per cent to India's GDP and employs as many as 19 million people. The auto components sector has been observing robust growth, and turnover is anticipated to reach US\$ 200 billion by FY26 from US\$ 43.5 billion in FY17. India's exports of auto components could account for as much as 26 per cent of the market by 2021.

India is emerging as global hub for auto component sourcing. A cost-effective manufacturing base keeps costs lower by 10-25 per cent relative to operations in Europe and Latin America. Relative to competitors, India is geographically closer to key automotive markets like the Middle East and Europe. Global auto component players are increasingly adopting a dual-shore manufacturing model, using overseas facilities to manufacture few types of components and Indian facilities to manufacture the others.

## MANUFACTURING

---

The Gross Value Added (GVA) from the manufacturing sector was US\$ 350.4 billion in FY17. The sector's contribution to the country's GDP stood at 16.51 per cent in 2016. The electronic goods industry is one of the fastest growing industries and is expected to be worth US\$ 400 billion by 2020.

The growing customer base and the increased penetration in consumer durables segment have provided enough scope for the growth of the Indian electronics sector. Also, digitisation of cable could lead to increased broadband penetration in the country and open up new avenues for companies in the electronics industry.

## RAILWAYS

---

The Indian Railways is among the world's largest rail networks. The Indian Railways network is spread over 115,000 km, with 12,617 passenger trains and 7,421 freight trains each day from 7,172 stations plying 23 million travellers and 3 million tonnes (MT) of freight daily. India's railway network is recognised as one of the largest railway systems in the world under single management.

The Indian Railway network is growing at a healthy rate. In the next five years, the Indian railway market will be the third largest, accounting for 10 per cent of the global market. Indian Railways, which is one of the country's biggest employers, can generate one million jobs, according to Mr Piyush Goyal, Union Minister for Railways and Coal. In order to develop three new arms of Dedicated Freight Corridor (DFC) in the various regions of the country, Indian government is planning to invest Rs 3,30,000 crores (\$50.98 billion). Also, Indian Railways is planning to invest in order to adopt European Train Control Systems (ETCS) which will help in the development of the infrastructural facilities.

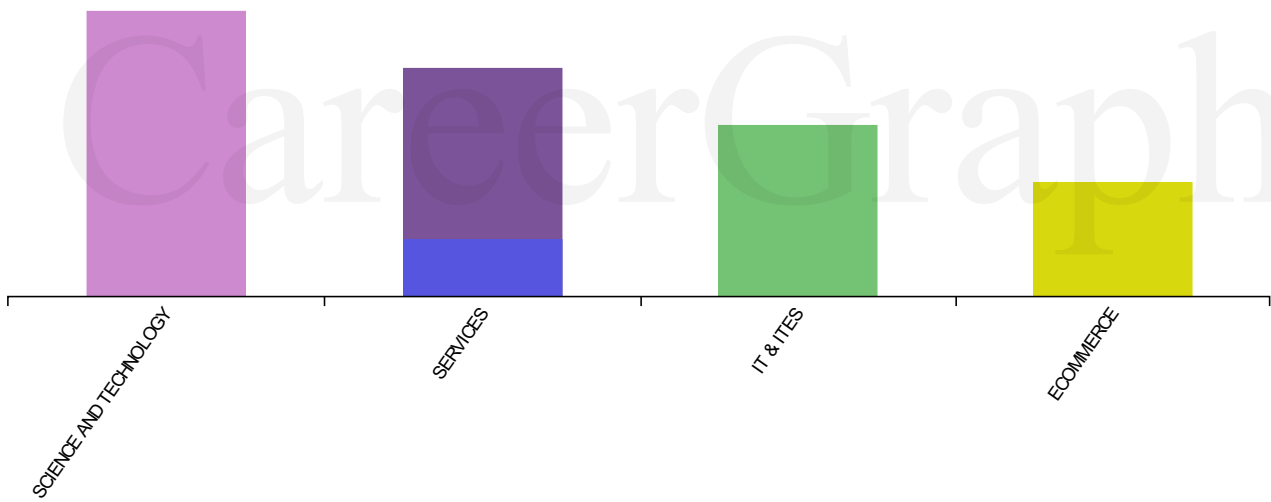

## PREFERRED INDUSTRY Vs RECOMMENDED INDUSTRY

### RECOMMENDED INDUSTRY

### YOUR PREFERRED INDUSTRY

None of your preferred industry is among the industry we recommend.

## ACADEMIC PROFILING

---

Academic profiling takes into account the education and job roles that are more suited to the educational profile required for the job. As new career options emerge, we believe this can help aspirants to move into newer territories of learning and earning using faculties that have been trained over the years in subjects of importance. While the importance of further learning is always encouraged, there are job roles which can fit based on the current education levels which we showcase in this section.

The education that we have received till now becomes a great enabler for our first jobs. The job world looks at our education as a reflection of our interests .

However, the number of job roles that we can choose from has drastically increased . Some obvious roles are education agnostic - especially creative jobs

Government jobs are also often a viable option for people from most streams of study . If you are looking at government jobs alongside your graduation, you would most likely be eligible for clerical / technician positions. If you are looking at Government jobs after post graduation, you will mostly be eligible for Officer level jobs.

Setting up your own business or joining a family business is also a viable option where your education may not be of primary importance

CareerGraph

---

"The gem cannot be polished without friction nor man without trials."

-Confucius (He was a Chinese teacher, editor, politician, and philosopher of the Spring and Autumn period of Chinese history.)

---

A detailed study of your education shows that you are eligible for many job roles.

### Job roles suggested by us

Signal processing engineer Sales and Marketing

Higher education lecturer / Subject matter expert journalist / Writer

"I suppose leadership at one time meant muscles; but today it means getting along with people."  
-Mahatma Gandhi (He is known as the Father of the Nation - India)

---

## WAY FORWARD

PexiScore recommends the following as a consolidated view of the strengths, career and job role aspirations and your fitment; it summarises and highlights the best of options we could recommend for you and a guide for your future endeavours in conventional career choices for you.

### TEMPERAMENT HIGHLIGHTS

Job security is key  
Can be flexible in career choices  
Can be intensely devoted to their careers.  
Can quit jobs if emotionally disturbed.

### APTITUDE STRENGTHS

You are relatively proficient in comprehending fundamental arithmetics and applying numerical concepts. You can improve on Numerical ability further, through practise. You gather information systematically and can establish facts & principles for efficient judgment. Very likable qualities of a good leader. Good going !! You are quite proficient in English comprehension and dialect. You gather information systematically and can establish facts & principles for efficient judgment. Very likable qualities of a good leader. Good going !! You have good logical thinking while executiing and determining the optimum decisions. That is good news and will bring you success.

### BEHAVIOUR STRENGTHS

You are quite proficient in English comprehension and dialect. You are participative in ancillary activities and a cultural fit. Interviewers will like that trait in you. You are a very good team player and would be an asset to groups and teams. Good work !! You seem keen in upskilling with new and latest knowledge, tools and resources. Keep upgrading yourself like this and you will surely succeed. You gather information systematically and can establish facts & principles for efficient judgment. Very likable qualities of a good leader. Good going !!

### CAREER AS PER INDUSTRIES

ENGINEERING AND CAPITAL GOODS  
AUTOMOBILES

### JOB ROLES FOR BEST FITMENT

Signal processing engineer Sales and Marketing, Higher education lecturer / Subject matter expert journalist / Writer, RF Engineer Sales and Marketing, Power systems Engineer Sales and Marketing, Opto-electronics and fiber optic Engineer Sales and Marketing, Circuit Designer Sales and Marketing, Government Administration and Public Servant jobs

Now that we have come to the end of this report; we encourage you to write down some actions that you seek to undertake based on the report and your understanding; Which of the statements and choices fit with your own understanding? What are the statements or choices that seem aligned with what we have mentioned about you?

Are there choices or statements that do not seem to fit you or your view of yourself? Check them with your friends and close ones and then write down those which seem to match our statements and the ones your close friends mention as strikingly similar.

Make an Action Plan:

What learning initiatives do you plan to take about your career further?

What are some of the most important issues to manage based on the report?

When people get an idea in their heads, they consciously and unconsciously search for evidence of it. This is the Confirmation Bias.
